Employment History

2015-present — Front-end Developer
Sierra Club; Oakland, CA
Managed Sierra Club's addup.org web property which included creating
new features, and modifying existing features. Tech was mostly vanilla
javascript and React. Liaised with third party vendor that built the
site. Integrated customized features using Salesforce apis for data
management. Conducted various A/B testing using Optimizely testing
suite.

2013-2014 — Senior Front-end Developer
GE Software; San Ramon, CA
Developed single page application modules in angular and vanilla
javascript. Provided team expertise in front-end html/css semantics
and responsive design fundamentals. Also had projects that used
Bootstrap, HTML5 Canvas, High Charts, and Phone Gap. Used Jasmine
testing framework and Karma to perform javascript unit testing.

2011-2013 — Senior Front-end Developer
Expedia Inc; San Francisco, CA
Collaborated with back-end developers, and UX/designers to provide the
front-end development of HTML, Javascript, and JSTL for new and
updated application features for both desktop and mobile sites. Most
recently, architecting a mobile-first responsive HTML5 and CSS3
methodology with a focus on website performance optimization.

2006-2011 — Lead Front-end Developer
1up.com, Hearst Media; San Francisco, CA
Duties include the hand-coding of HTML, Javascript and JSTL within the
JSP layer using Eclipse with CVS. Updating legacy javascript with
jQuery framework. Managed a small Production Team of Associate Web
Producers to deliver daily website content, updates, landing pages,
promotions, and emails. Converted the sites' hundreds of table-based
HTML layout JSPs to valid semantic table-less xhtml and valid css.

2000-2006 — Website Architect
MarkMonitor/Alldomains.com; San Francisco, CA
Responsible for front-end development of markmonitor.com,
alldomains.com and allwhois.com as well as the internal corporate
intranet. Primary duties included HTML, and programming in Perl &
Javascript, email campaigns, and marketing deliverables. Liaison
between Marketing and Engineering. I began this position with
Alldomains.com which was acquired by MarkMonitor in 2003.

1999-2000 — Webmaster
Stedmann Marketing; Calistoga, CA
Designed website templates and implemented websites, hosting, and
email for clients. Designed, developed, and maintained web and client/
server applications and their UI using Perl and Javascript. Duties

also included client logo design, system administration, and network
engineering.
